

## Safety Breakaway Coupling

### 'Good Things Come in Small Packages'

This NEW innovative design from KLAW, provides easy access for all maintenance and servicing. Its unique user friendly 'Modular System', allows all key components to be interchanged without the need to replace the complete unit.

K2 is the all NEW 1" (DN25) Safety Breakaway Coupling, it utilises the world renowned KLAW Flip-Flap mechanism, which offers many distinct advantages including, low pressure drop, light weight compact design, NO partial break with uncontrollable spillage.

K2 offers the best flow characteristics of any 1" NB valved breakaway coupling in the world.

K2 is particularly suitable for HazChem applications.

K2 as with all KLAW Safety Breakaway Couplings provides protection for personnel, protection of equipment and and protection for our environment.

K2 provides you with the safe solution for the transfer of all hazardous and non-hazardous materials.

K2 is the New Safety Breakaway Coupling from the global leader.

Light Weight

Compact

Easy to Maintain

Minimal Headloss

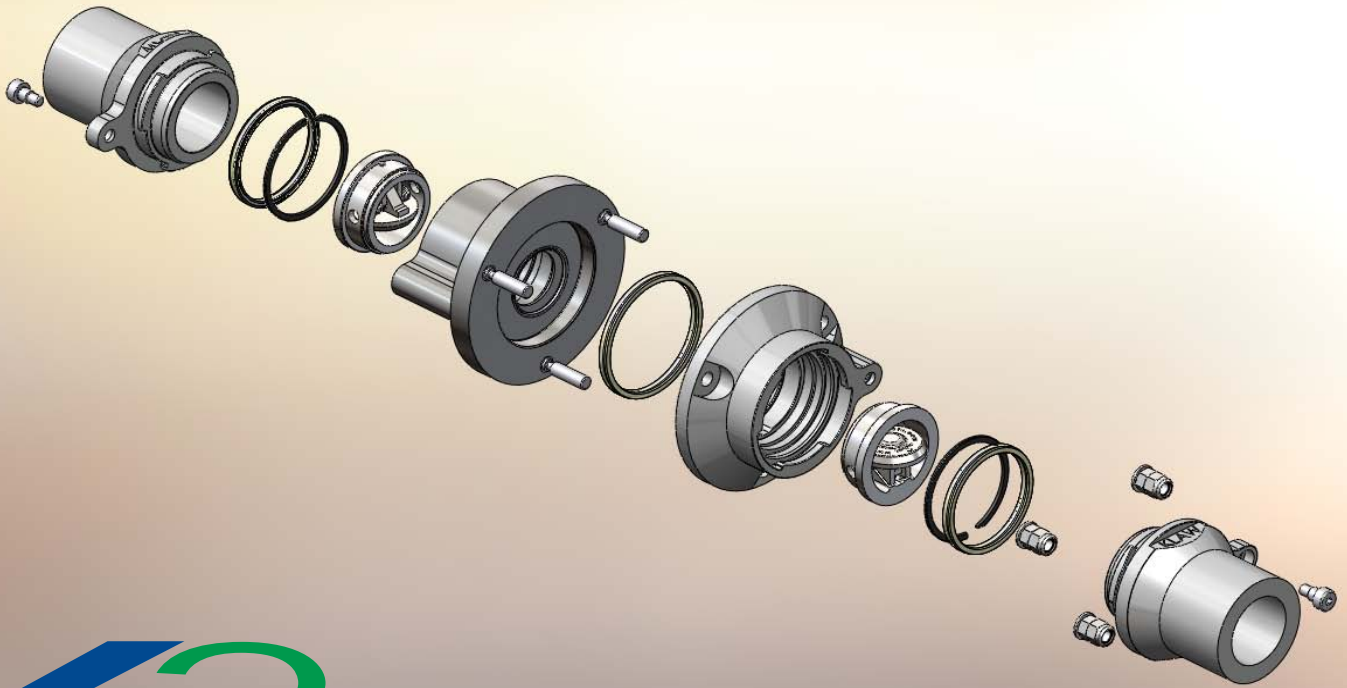

100% Closure

Suitable Applications Include:-

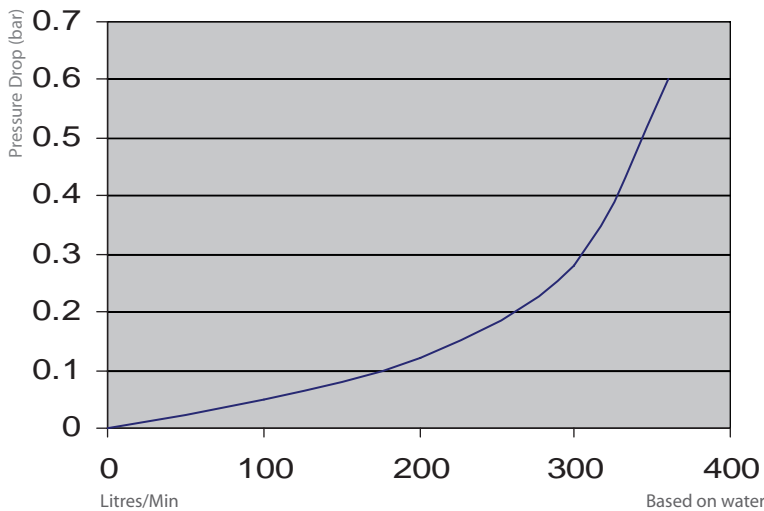

- Ship / Barge to Jetty
- Ship to ship
- Rail Car
- Road Tanker

The Safe Solution For You and The Environment

## Unique Modular System

safety breakaway coupling

### Materials:

Stainless Steel, LF2 Carbon Steel, Monel, Hastelloy, Aluminium, others on request.

### Breakload Settings

Coupling breakloads can be designed to suit any application criteria.

### Pressure Ratings

Standard range up to 40 BAR - higher ratings available.

**The SAFE Solution for you and the environment from the global leader.**
