

Leading the way in helping you reduce fugitive emissions

Assentech prides itself on helping the tank storage industry increase **safety, compliance and profitability**.

We do this by providing consultancy, products and services. **Our revolutionary range of Vent-Less Test Benches** are automatic, easy to use and accurate, providing the ultimate breather vent testing platform.

We represent a range of **prestigious manufactures** of tank storage, fluid transfer and tank venting equipment and support compliance with test criteria aligned to **API2000 and ISO 28300**.

Along side this we also provide **rapid response, full maintenance and service capability** for all the equipment we supply.

We care about the world we live in

On a mission to help the storage tank industry reach net zero emissions, Assentech is leading the way by creating innovative technology and services that detect and prevent fugitive emissions.

Core Products & maintenance services

Breather Valves

We only offer breather valves with high quality seals, and are leak tested to **API 2000** and **ISO 28300** to prevent fugitive emissions. **Breather vent sizing, calibration, inspection, test and service available.**

Couplers

We offer Couplers to **protect people, processes and aid product conservation** (through spillage reduction.)

Coupler repairs available.

Bursting Discs

Offers instantaneous pressure relief to **prevent accidents** and damage to process components.

Loading Arm Systems

Captures vapours for tanks and prevents emissions leakagss. They are ideal for loading andunloading petroleum products, chemicals and liquefied gases, where the emissions can be extremely harmful to our environment if they are not contained.

Loading arm inspection and overhaul available.

OGI Cameras

These allow operators and/or environmental protection/Safety bodies to **effectively monitor fugitive emissions.**

Major Projects

With IFR & Geodesic Dome supply and Installation we can provide critical product containment and protection.

Leasing options are also available
